Education

Tecmilenio University

Bachelor of Engineering in Software Development

GPA: 96/100 (4.0 US equivalent) – Graduated with Honors

Guadalajara, Jalisco, Mexico

May 2026

Experience

Toshiba Global Commerce Solutions

Software Developer Intern

Zapopan, Jalisco, Mexico

May 2025 – May 2026

- Developed the frontend for an internal AI-powered product compatibility platform, enabling sales teams to verify compatibility across Toshiba products and software versions.
- Expanded responsibilities by contributing to a second production application after assuming frontend ownership following a team member's departure.
- Designed and implemented a document ingestion portal that allows administrators to upload PDFs, Word documents, PowerPoint presentations, Markdown files, and other knowledge sources used by the AI assistant.
- Developed an administrative dashboard for managing and reviewing closed Service Requests (SRs), improving visibility into historical support cases.
- Redesigned the production chatbot experience from a single question-and-answer interface into a conversational chat interface with persistent context, enabling multi-turn interactions and improving the overall user experience.

Caritas de Guadalajara A.C.

Web Developer

Guadalajara, Jalisco, Mexico

Aug 2023 – May 2024

- Developed a new interactive website from the ground up to improve the organization's online presence and communicate its mission, programs, and services.
- Designed and implemented responsive user interfaces using HTML, CSS, and JavaScript, ensuring compatibility across desktop and mobile devices.
- Collaborated with stakeholders to translate organizational requirements into functional website features and an improved user experience.

Certifications

- AWS Academy Graduate – Data Engineering
